

APPLIVO

How to Connect Your Internshala Account

Step-by-step guide with screenshots

Applivo automates your job applications on Internshala. To do this, it needs access to your Internshala session. This is done by copying your browser cookies — a one-time 2-minute setup. **Your password is never seen or stored by Applivo.**

What are cookies?

Cookies are small files your browser saves when you log into a website. They prove to the website that you are logged in — like a digital ID card. Applivo uses your Internshala cookies to apply for internships on your behalf, without needing your password.

■ Cookies expire after 2–4 weeks. Applivo will email you when you need to reconnect. The process takes under 2 minutes each time.

1

Go to Internshala and Log In

Open internshala.com in your browser

Open **internshala.com** in Chrome, Firefox, or Edge. Click **Login** at the top right. Enter your email and password and click the blue **Login** button.

The screenshot shows the Internshala website's login page. A modal form is open in the center, titled "Student" and "Employer / T&P". The form has a "Login with Google" button, an "OR" separator, and fields for "Email" (containing "sudharsan97511@gmail.com") and "Password" (masked with dots). Below the password field is a "Forgot password?" link and a blue "Login" button. At the bottom of the modal, it says "New to Internshala? Register (Student / Company)". The background shows the Internshala homepage with a navigation bar, a search bar, and a "Candidate sign up" section with a "Continue with Google" button. The page also features logos for Coca-Cola, Nestlé, and HC.

▲ Internshala login page — enter your email and password, then click Login

■ **Tip:** Make sure you log in as a Student, not Employer. The Student tab should be selected (shown in blue).

2

Confirm You Are Logged In

You should see your dashboard

After logging in, you will see your Internshala dashboard with your name at the top (e.g. **Hi, Sudharsan!** ■). This confirms your session is active and cookies exist in your browser.

The screenshot shows the Internshala dashboard for a user named Sudharsan. At the top, a banner says "6 Sharks are hiring 1 intern each. Pitch your idea. [Apply now](#)". The navigation bar includes "Internships", "Courses" (with an "OFFER" tag), "Jobs", "IS PRO", and a profile icon. The main content area is divided into three sections: 1. "Hi, Sudharsan! 🖐️" with the text "Let's help you land your dream career". 2. "To do list (4)" with four items: "Improve your resume" (3 suggestions), "Skills assessment pending" (requested by Niviverse Technologies Private Limited), "Skills assessment pending" (requested by Digital Heroes), and "Skills assessment pending" (requested by Hooman Digital LLP). 3. "Trending on Internshala 🔥" featuring three promotional cards for certification courses. Below this is a "Latest internships" section.

▲ Internshala dashboard — confirms you are successfully logged in

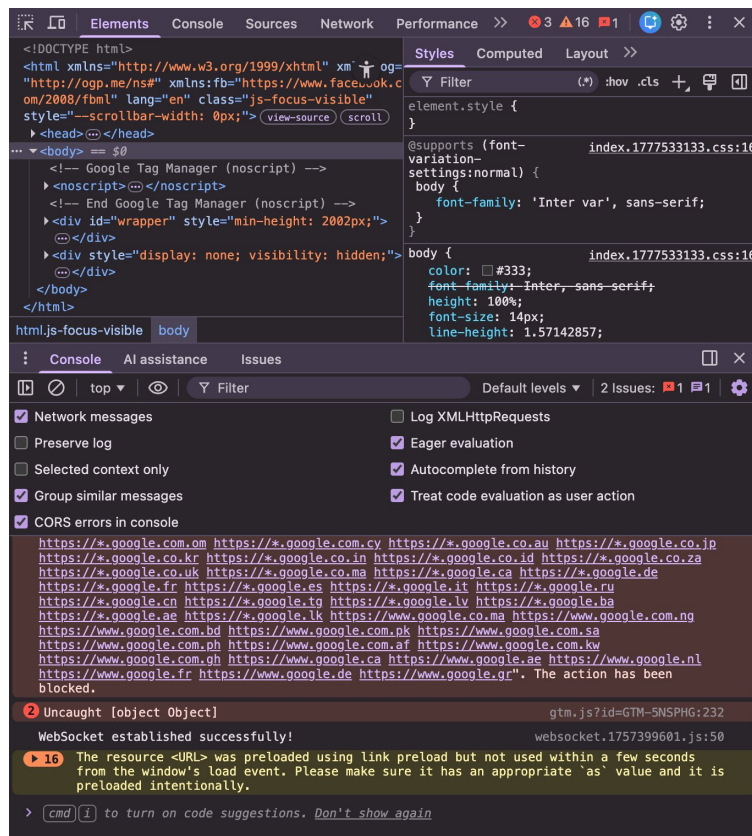

■ If you see the login page again, your credentials were wrong. Try again before proceeding.

3

Open Developer Tools

Press F12 on Windows/Linux · Cmd+Option+I on Mac

While on the Internshala page, press **F12** (Windows/Linux) or **Cmd + Option + I** (Mac). A panel will open on the right or bottom of your screen. This is called Developer Tools.

▲ DevTools panel opens — you can see Elements, Console, Sources, Network tabs at the top

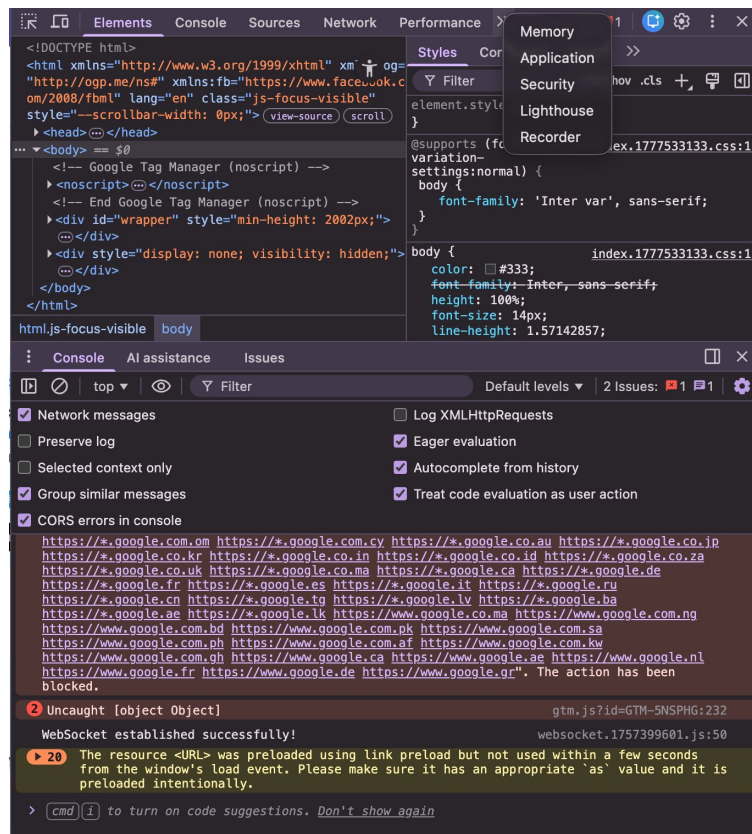

■ **Tip:** If you don't see the panel, try right-clicking anywhere on the page and selecting "Inspect" from the menu.

4

Click the ">>" Arrow and Select "Application"

Find the Application tab in DevTools

At the top of the DevTools panel you will see tabs: **Elements**, **Console**, **Sources**, **Network**. If you don't see **Application**, click the >> arrow at the end of the tabs row. A dropdown will appear — click **Application**.

▲ Click the ">>" arrow to reveal the Application tab in the dropdown menu

5

Navigate to Cookies → internshala.com

Find your Internshala session cookies

In the left sidebar of the Application panel, find **Storage** section. Click **Cookies** to expand it. Then click <https://internshala.com>. You will see a table of all your cookies. Look for entries like **is_logged_in**, **isc**, **iso**, **AWSALB** — these confirm you are logged in.

▲ Application → Cookies → https://internshala.com — you can see all your session cookies

■ You should see at least 10–15 cookies in the list. If the list is empty, go back and log in again.

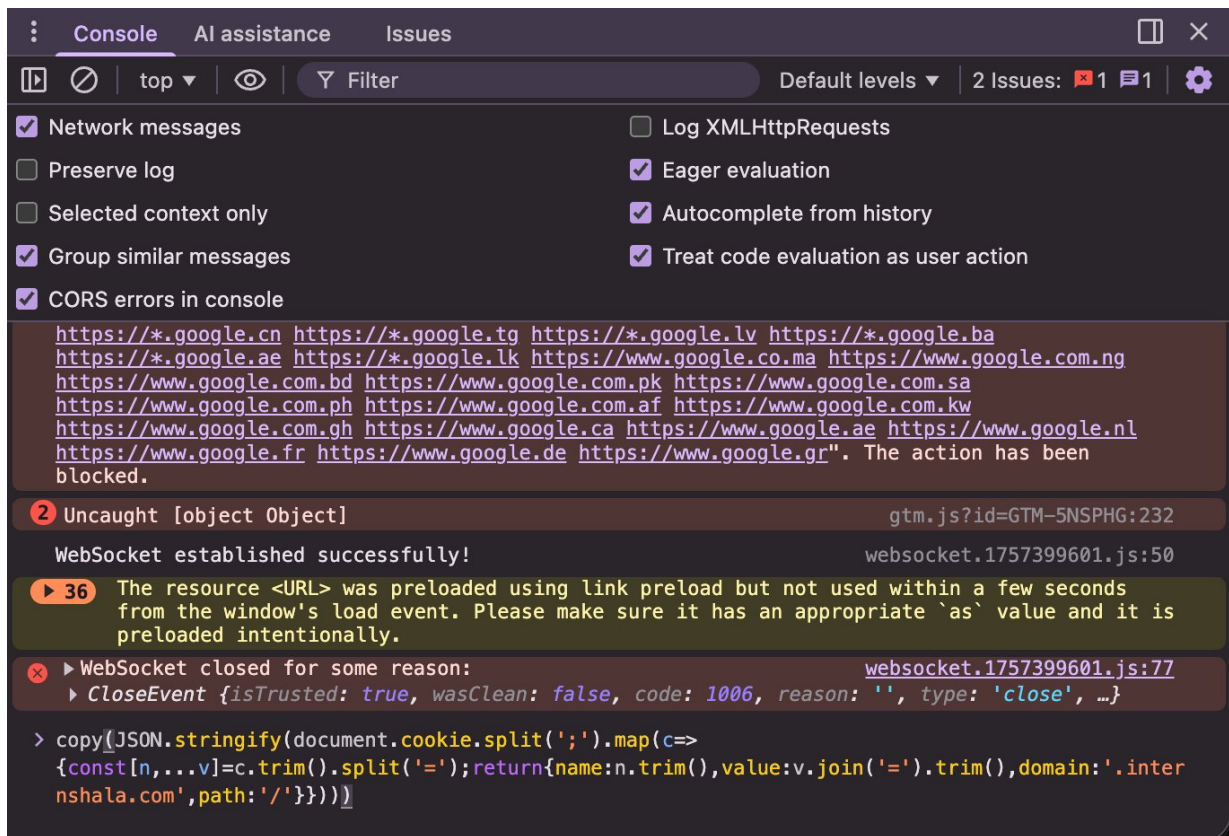

6

Go to Console Tab and Run the Copy Script

This copies all cookies to your clipboard in one click

Click the **Console** tab at the bottom of DevTools (or at the top if you don't see it at bottom). Click inside the Console input area where you see the **>** symbol. Copy the script below, paste it in, and press **Enter**:

```
copy(JSON.stringify(document.cookie.split(';').map(c=>{const[n,...v]=c.trim().split('=');return{
name:n.trim(),value:v.join('=').trim(),domain:'.internshala.com',path:'/'}})))
```

▲ Paste the script in the Console and press Enter — nothing visible happens but cookies are copied

■ **Tip:** After pressing Enter, nothing appears on screen — that is normal. The cookies have been silently copied to your clipboard. You will paste them in the next step.

7

Go Back to Applivo and Paste Your Cookies

Final step — connect your account

Go back to your **Applivo Connect** page. Click inside the large text box that says "Paste cookies here...". Press **Ctrl+V** (Windows) or **Cmd+V** (Mac) to paste. You will see a long JSON text starting with `[{"name":`. Finally click the **Connect Internshala Account** button.

Your pasted cookies will look like this:

```
[{"name": "_session_id", "value": "abc123xyz...", "domain": ".internshala.com", "path": "/"},
{"name": "is_logged_in", "value": "1", "domain": ".internshala.com", "path": "/"},
{"name": "isc", "value": "18p9lrqubr2p6o6...", "domain": ".internshala.com", "path": "/"}, ...]
```

■ You're connected!

Applivo will now automatically scrape internships matching your profile, score them with AI, and apply on your behalf — every hour, automatically.

Frequently Asked Questions

Q: Is this safe? Does Applivo see my password?

A: No. Applivo never sees your password. Cookies are just session tokens — they expire automatically and cannot be used to change your password or email.

Q: What if I paste the wrong thing?

A: The system will show an error. Just copy the script again, run it in Console, and re-paste.

Q: How long do cookies last?

A: Internshala cookies typically last 2–4 weeks. When they expire, Applivo will send you an email asking you to reconnect. The process takes under 2 minutes.

Q: Can I disconnect at any time?

A: Yes. Go to your Applivo Connect page and click Disconnect. Your cookies are deleted immediately and automation stops.

Q: What if I don't see the Application tab in DevTools?

A: Click the >> arrow at the end of the DevTools tab row. Application will appear in the dropdown.

Q: The Console shows an error when I paste the script — what do I do?

A: Make sure you are on the internshala.com page (not Applivo) when you run the script. Also ensure you copied the entire script without missing any characters.
